

CERTIFIED PRE-OWNED

Get the World's Most Reliable Gas
Monitors at an Exceptional Value

FACTORY REFURBISHED

Every Industrial Scientific CPO monitor gives you virtually all of the durability, reliability, and dependable performance of a brand-new monitor. You can be assured that the monitor you receive has been scrutinized to the exacting standards you would expect from Industrial Scientific.

Only instruments that pass a rigorous multi-point inspection, including intrinsic safety approvals, are included in this program. Our CPO instruments are certified once they pass a factory inspection checklist to ensure that all components perform as originally designed, and then are backed by a one-year warranty.

MX6 iBRID MULTI-GAS MONITOR

The MX6 iBrid® is more than an intelligent hybrid of Industrial Scientific's best monitoring technologies—it's the most adaptable six-gas monitor on the market. The MX6 iBrid uses five sensor slots to detect up to six gases. Each of those slots accepts a variety of sensors, which means you can use the instrument with a PID sensor one day and an infrared sensor the next. Settings allow you to adapt the instrument's behavior based on your application.

- Personal or confined space monitoring
- 1-6 gas monitor
- Full-Color LCD Display
- 24 sensor options including PID and IR
- O₂ sensor – 6 months old or newer
- Ideal for Electrical/Gas Utilities, Steel Production, Oil & Gas, Chemical, Fire Services, Mining, and Water/Waste Water Treatment
